

Comparison Between Boluoke® (lumbrokinase) and Nattokinase

Fibrinolytic Strength	Boluoke® (lumbrokinase)	Nattokinase ^{1,2}
Plasmin Unit (CU/g wet wt.)	100	40
t-PA Unit (u/mg)	120,000	12,000**

***The nattokinase used in measuring the t-PA activity is from research cDNA source, a much purer enzyme than the commercially available source from natto extract.*
